THE WHIG PLATFORM.

The Whigs of the United States, in Convention The Whige of the United States, in Convention assembled, firmly adhering to the great conservative republican principles by which they are controlled and governed, and now, as ever, relying upon the intelligence of the American people, with an abiding confidence in their capacity for self-government and their continued devotion to the constitution and the Union do preclaim the following the constitution and the Union, do proclaim the fol-lowing as the political sentiments and determina-tions for the establishment and maintenance of which their national organization as a party is

1. The government of the United States is of a limited character, and it is confined to the exercise of powers expressly granted by the consti-tution, and such as may be necessary and proper for carrying the granted powers into full execu-tion; and that all powers not thus granted or necessarily implied are expressly reserved to the

States, respectively, and to the people.

2. The State governments should be held secure in their reserved rights, and the general government sustained in its constitutional powers, and the Union should be revered and watched over as "the palladium of our liberties."

3. That, while struggling freedom everywhere dress, of keeping ourselves free from all entangling alliances with foreign countries, and of never quitting our own to stand upon foreign That our mission as a republic is not to propagate our opinions, or impose on other countries our form of government by artifice or force, but to teach by example, and show, by our success, moderation, and justice, the blessings of self-government and the advantages of free in-

4. That where the people make and control the government, they should obey its constitution, laws, and treaties, as they would retain their self-respect and the respect which they claim and will enforce from foreign powers.
5. Government should be conducted upon prin

ciples of the strictest economy, and revenue sufficient for the expenses thereof, in time of peace, ought to be mainly derived from a duty on imports, and not from direct taxes.; and in levying such duties, sound policy requires a just discrimination, and protection from fraud by specific du-ties when practicable, whereby suitable encour-agement may be assured to American industry, equally to all classes and to all portions of the

6. The constitution vests in Congress the power to open and repair harbors, and remove obstruc-tions from navigable rivers; and it is expedient that Congress should exercise that power, whenever such improvements are necessary for the common defence, or for the protection and facility of commerce with foreign nations or among the States; such improvements being, in every in-stance, national and general in their character.

7. The federal and State governments are parts of one system, alike necessary for the common prosperity, peace, and security, and ought to be regarded alike with a cordial, habitual, and immovable attachment. Respect for the authority of each, and acquiescence in the constitu-tional measures of each, are duties required by the plainest considerations of national, of State, and of individual welfare.

8. The series of acts of the 31st Congress com-

monly known as the Compromise or Adjustment (the act for the recovery of fugitives from labor included) are received and acquiesced in by the Whigs of the United States as a final settlement, in principle and substance, of the subjects to which they relate; and, so far as these acts are concerned, we will maintain them, and insist on their strict enforcement, until time and experience shall demonstrate the necessity of further legislation, to guard against the evasion of the laws on the one hand, and the abuse of their powers on the other-not impairing their present fliciency to carry out the requirements of the constitution; and we deprecate all further agitation of the questions thus settled, as dangerous to our peace, and will discountenance all efforts to continue or renew such agitation, whenever, wherever, or however made; and we wilt maintain this settlement as essential to the nationality of the Whig party and the integrity of the Union.

machine for crushing, grinding, and pulverizing. Recently Patented in this Country and Europe.

Recently Patented in this Country and Europe.

COCHRAN'S Flanospherical Quartz Crushing and Pulvenezing Machines are now in daily operation for the
inspection of the public, and will be submitted to any reasonable practical tests proposed by parties interested.

These machines, by their simplicity of construction, their
durability, the undoubted principles upon which they operate, their effective operation and result, are justly entitled
to the consideration of all parties engaged in grinding,
crushing, and Pulverising Quartz, Iron Ore, Zine, Copper,
and Leai Ores, and all other Ores or Mineral substances.

It is the peculiar feature of the economy of these machines that they are found capable of crushing and pulverging into the finest powder any amount of Quartz or other cannot not they are found capanio or crusing and priva-izing into the finest powder any amount of Quartz or other earthy matter, in proportion to the amount of weight or power applied. The earthy matter is so completely ground and pulverized, that the Gold may be easily separated, and subjected to any process of amalgamation that may be ne-

essary.

The machines work and deliver wet or dry, as may be re-The machines work and deliver wet or dry, as may be required, and run with little friction, (being almost without machinery,) requiring no lubricating; the principle upon which they operate precludes the possibility of their being put out of order; nor do they heat any material while being putverized. They are at once applicable for all purposes of grinding and putverizing, from those required by the Druggist to those of the most extensive operations in California and Australia.

These machines are from two to twelve feet in diameter, with balls or spheres from three inches to five feet in diameter, each machine weighing from 250 pounds to 20 tons each, and are sold, with the right to use them, at from \$100 to \$5,000 each.

each, and are sold, with the right to use them, at from \$100 to \$5,000 each.

They can be worked by steam, water, horse or manual power, according to their size; and by changing the velocity and proportioning the weight on the top of the balls, any desired amount of power may be used, from that of a man or horse upward.

The proprietors of this invention solicit examination, and will prove by practical tests the was superiority and economy of these machines over any other, for crushing, grinding, or pulverzing, herdefore affered to the public.

These machines may be seen in operation at the foot of South Eighth Street, Williamsburgh, at the large Patent Block and Saw Factory of Messrs, Burr, Waterman & Confirst street south of Peck Slip Ferry, every day, from 7 to 9 a. m., and from 4 to 6 p. m. For further particulars, apply to E. & J. BUSSING & CO., and 23—2w 32 Cliff street, New York.

Mechanics, Manufacturers, and Inventors.

THE Eighth Volume of the SCIENTIFIC AMERICAN commences on the 18th of September. It is principally devoted to the diffusion of useful practical knowledge, and is eminently calculated to advance the great interests of industry—Nechanical, Manufacturing and Agricultural—the gonius and master-spirit of the nation.

It is unrivalled as a Journal of the Arts and Sciences, and maintains a high character at home and abroad.

The publishers pledge thomselves that the future volumes shall at least equal, if not surpass their predecessors. Among the subjects chiefly brought forward and discussed in its columns, are Civil Engineering, Architecture, Railroads, Bridges, Arricultural Implements, Manufactures of Metals, Fibrous and Textile Substances, Machinery for the purpose, Chemical processes, Distilling, Coloring, &c., Steam and Gas Engines, Boilers and Furnaces, Mathematical, Philosophical and Optical Instruments, Cars, Carriages, Water and Gas Engines, Boilers and Furnaces, Mathematical, Philosophical and Optical Instruments, Cars, Carriages, Water Wheels, Wind and Grinding Mills' Powers, Plauing Machines, Tools for Lumber, Brick Machines, Farming, Fire Arms, Electricity, Telegraphs, Surgical Instruments, &c., besides Claims of all Patents, Reviews, Notices of New Inventions, American and Foreign. The work is in form for binding, contains several hundred Engfavings, over four hundred pages of printed matter, and a copious Index. Nearly all the valuable Patents which issue weekly from the Patent Office are illustrated with Engravings in its columns, thus making the paper a perfect Mechanical Encyclopedia for future as well as present reference.
Valuable Pramiums are offered for the largest list of Subscribers to this Volume. It is published weekly by MUNN. & CO., at their Patent Agency Office, 128 Fulton street, New York.

KRAUSER'S PATENT CLOVER-SEED HAR-VESTER
BEFORE THE PUBLIC FOR THE FIRST TIME

IS BEFORE THE PUBLIC FOR THE FIRST TIME

I TS utility is beyond comparison with any other farming
implement now in use. It takes the seed from the field,
leaving the straw or grass all standing. It weight two hundred and fifty pounds, is drawn by one horse, and gathers
from ten to twelve acrea per day. The fingers, or teeth,
catch all the heads, the revolving knives cut them off and
throw them back into the box, which will cross a twentyacre field without emptying. The heads are them loaded
into a wagon and taken directly to the mill for cleaning,
thus diminishing the labor three-fourths, and saving all the
need. This muchine comes so low that every furmer will
have it, and pays the manufacturer 300 per cent.

E. WHEELER, Agent for Washington.

CROSS KETS, WASHINGTON TOWNSHIP, CAMDEN Co., N. J., } We, the undersigned, do certify that we have seen Mr. Krusser's Patent Clover Harvester in operation, and it has given perfect satisfaction. It has gathered many of the farmers' clover in this neighborhood—it is all that Mr. Krauser and his bills represent it to be. The farmers have given one-half for gathering and threshing.

JAMES D. TIMBERMAN, JOSEPH DEWALD, WILLIAM P. GARWOOD, JOHN F. COOK,

JOHN F. COOK, JAMES B. COOK, JAMES COLLINS, CHARLES LEWIS, THOMAS TUMBLESON, PETER H. JONES,

Long-a-Coming, October 7, 1851.

This is to certify that Mr. G. J. Naylor has gathered clover off of a sixteen-acre field of mins, which has been pastured two more is with ten head of cattle, and it produced six bushels smil a half and one peck of seed. I gave him two-thirds for gathering and cleaning. I think his machine is first-rate, and answers all the purpose that is intended.

NEHEMIAH NICHOLSON.

The following points out the profitable nature of the Harvester:

KRAUSER'S PATENT CLOVER-SEED HARVESTER-We have conversed with a number of Farmers, and they are of opinion that there are at least 3,000 acres in each township in Camden or Gloucester county, New Jersey. Admitting there are but 1,000, it is said that each acre will yield from 1½ to 3 bushels. Reducing it to a certainty of yielding but 1 bushel per acre, what will it cost to gather and thresh 1,000 acres.

,000 acres? Threshing...... Incidental expenses.....

Cost of harvesting, &c., 1,000 acres..... ..\$500

have found them to agree unanamously have found them.

Perhaps no invention offers greater inducements for a profitable investment than the Harrester. For an enterprising young man, of good business habits, a large sum of money could without doubt be realized from the sale of rights in the different States of the Union not yet disposed of. By calling at this office, it can be demonstrated satisfactorily that men of moderate capital could not choose a better or more money-paying business.

Those who wish to see a model of this celebrated farming implement, and the satisfactory manner in which it operates, can do so by calling at

Hampton's Vegetable Tincture!

Hampton's Vegetable Tincture!

"COME, LET US REASON TOGETHER."

ORAL TESTIMONY.

THOUSANDS feel it a duty to talk to their afflicts of friends of the henefil derived from HAMPTON's VEGETABLE TINCTURE. From day to day we have given the outsidestes of curse performed on our be-known eithers, and still we have a perfect avalanche of letters pouring in upon us—all, all giving a weight free from the first mercantile from first mercanti

and do likewise!!

Baltimors, Feb. 9, 1862.

Messrs. Mortimer & Mowbray: Gentlemen: It is with real pleasure that I am able to attest to the general healing and curative powers of Dr. Hampton's Vegetable Tincture. Sometime during last November I was taken with a very bad and serious cough. I was advised to take Cod-Liver Oil, and did so; but getting no better, I was induced to try your Tincture. I got one bottle, and before I had used it all my cough left me. Permit me also to state that, for the last fifteen years, I have suffered very much from Acute Rheumatism and Vertigo, confining me at times to my bed. I am fully convinced that I owe my present good health to the use of the Tincture, and a kind Providence.

You are, my friends, at liberty to use this as you may think propers and believe me, yours, very respectfully,
N. B.—I can be seen at any time at the Mayor's office.

THE ALMOST MIRACULOUS CURES made by Hamp ton's Vegetable Tincture on our most respectable dit-zens—men well known and tried—we challenge the world to show anything on record in medicine to equal it. Many hundreds who have felt its healing powers bear the same testi-

N. B .- I can be seen at any time at the Mayor's

hundreds who have felt its healing powers bear the same testimony.

Messrs. Mortimer & Mowbray: Gauts: Last Soptember I was attacked with erysipoles, from which a dreadful ulcer formed on my right leg. Getting better of this, last November I took a deep cold, which led to what my physician told me was bilious pleurisy, which left me with a constant, deeply-seated, and pairfol cough, having no rest day or night, and constantly throwing up from my lungs a thick matter. I became much emaciated, growing weaker every day, and keeping my bed the greater part of the time. My friends thought I had the consumption, and at times I was also-of the same opinion. At this stage of my disease, after having tried many and various remedies, without success, a friend advised me to try DR. HAMPTON'S VEGETABLE TINC. TURE, and procured me a bottle, which I now pronounce the greatest medicine fever took: Before I had taken half the contents of one bottle I felt much improved; and now, having taken but two bottles, my cough and pains have entirely left me, and I am enabled to attend to business. I can truly say that, with the blessing of God, I have been restored to the health I now enjoy by the use of this most invaluable medicine.

Yours,

Schroeder, near Saratogs street.

Schroeder, near Saratogs

Truth stranger than Fiction!-None need despair !-A Lady's Testimony after thirty-eight years

A Lady's Testimony after thirty-eight years of suffering!

Were there not real virtue in this wonderful medicine, could it perform the astonishing cures made by it?

Northampron Co., April 13, 1852.

Mesers. Tyler & Adair: I have been afflicted with kineumatism, at times, from my twelfth year; I will be fifty years of sge the 18th of this month; the attacks were at times so severe as to render me helpless; I have tried various remedles to very little effect. Last October I was attacked in my shoulders, sides, back, and hips; I could not rest, day or night; I could not nove any part of my body without crying with pain; at this time I also tried many remedies, internal and external, without receiving any relief; I was at last advised to try HAMPTON'S VEGETABLE TINGUTURE; before I had taken one bottle of which I felt much better, and as I continued taking it I felt strength coming into my back and limbs, and my stomach strengthened and revived every way; I have taken five bottles, and am much better than I ever expected to be. I intend to use it whenever I need it, and would recommend it to the afflicted, believing Yours, ELIZABETH BAGWELL.

REV. VERNON ESKRIDGE, U. S. N. REV. VERNON ESKRIDGE, U. S. N.

PORTSMOUTH, (Va.,) Aug. 18, 1851.

Mr. J. E. Boush—Dear Sir: While I am in general opposed to Patent Medicines, candor compels me to state that I have great confidence in the virtues of Hampton's Vegetable Tincture. For several months past I have used It in my family, and in Dysepsia, loss of appetite, dizziness, and general debility, with entire success. So far as my experience extends, therefore, I take pleasure in recommending it to the afflicted as a safe and efficient remedy.

I am, respectfully, yours, VERNON ESKRIDGE, Unablain in the U. S. Navy.

HAMPTON'S VEGETABLE TINCTURE, by its mild action on the Stomach, Liver, and the Kidneys, will cure Dysepsia, Cough, Asthma, Bronchial and Lung Affections; ains in the Back, Side, and Breast; Consumption, Serofula, theumatism, Gout, Neuralgia, Fistuia, Piles, Bowel Combaints, Worms, Nervous Debility—with all diseases arising rom impure blood, and is the greatest Female Medicine ver known. from impure blood, and is the greatest Female Medicine ever known.

For Cholers Morbus, Cholic, Diarrhoss, and all diseases incident to the bowels in the summer season, it has no

THOS. A. SCOTT.

Protection from Lightning.

THE undersigned, being the duly appointed Agent of Spratt's Electrican and Electro-Mittallegist Lightning. Street and the Agent of Spratt's Electrican and Electro-Obstitute elements combined in their manufacture; thus rendering them equal to copper as conductors. They are in ten-feet lengths, with accurately-fitted brase-scraw connecting joints, an entire new style of metallic (natented) attachments, for brick or frame buildings; also, glass isolaters, of a novel and ingenious construction, (patented.) forming a lock; the whole mounted with a solid platinum silver point, (patented,) twelve inches long, surrounded at the base with three angular negative magnets, which possess the power, to an extraordinary extent, of discharging the opposite elements of the most fearful thunderstorm, and embrace the entire perfection of science up to the present time; the whole constituting the most magnificent and perfect silent conductor ever presented to the public.

Safety has not been compromised by affording these excellent rods at such low rates; the greatest attention has been given to their construction, so as to be readily attached. The astonishing power of the negative magnets, in discharging the air of its opposite elements, has been clearly demonstrated by the Electrometer, when unmagnetized point have shown but slight results, though placed under the same conditions. In fact, they gather and sliently discharge electricity from the atmosphere when you would scarcely suspect any being present.

These improvements being secured by double letters patent, you are hereby cautioned against laying yourselves liable, by purchasing of those who are not authorized, or who are substituting inferior imitations. All segents duly appointed can show their certificates. Here good rods or none.

CHARLES W. HEYDON, Washington City. Protection from Lightning.

I do hereby certify that I have applied various powerful chemical reagents to Spratt's Patent Points for Lightning-Rods, and that the results of these experiments convince me that they will resist the action of atmospheric causes, and thereby practors the action of the product of the produ that they will resist the action of atmospheric causes, and thereby preserve the extremity sharp—a condition most essential to protection against lightning. The reagents used in the above experiments were a solution of chloride of solution, (common sait,) acetic acid, sulphuric acid, and hydrochloric acid. With the first, there was no action on the metal; with the several acids, there was very slight—a fact

mificient to show that atmospheric influences would have JOHN LECONTE, Prof. of Nat. Phil. et Chem. UNIVERSITY OF GA., October 8, 1850. The Lightning Conductors of Mr. Spratt, offered to me, re well calculated to perform the office for which they are stended. Yours, truly, Prof. ROBT. PETER. LEXINGTON, Kr., February 20, 1850.

LEXINGTON, KY., February 20, 1850.

CHICAGO, September 3, 1850.

This may certify that I have examined, somewhat critically, James Spratt's Patent Lightning Rods, and that I am of opinion that it is constructed on scientific principles. For combining durability, cheapness, and efficacy, I deem it equal, and I think superior, to any other rod ever offered for my inspection.

combining durability, cheapness, and efficacy, I deem it equal, and I think superior, to any other rod ever offered for my inspection.

AUGUSTA, (GA.) November 11, 1850.

This will certify that I have examined the laghtning Rods, Metallic Points, and Jaolating Attachments, manufactured by Mr. Spratt, and rogard them as constructed in conformity to the general laws of the electric fluid; and the metallic compound constituting the Points, as promising, from the result of several tests to which they were submitted, to resist for years the action of those atmospheric causement likely to corrode them.

Prof. Phys. Sc., Emory College, Ga., and Prof. Chem. and Pharm., Medical College, Ga.

The Lightning Conductors put up by Mr. Henry M. Smith, of this city, on the plan of Mr. Spratt, appear to me to bery well devised; and, in point of mechanical construction, are the best I have ever seen.

It is to be hoped that the use of these Rods may become general, as an important auxiliary defence against a danger shich must be regarded as of no ordinary magnitude, to which all buildings are liable.

R. Sillman, Jr.,

Prof. of Chem. in the University of Louisville.

Louisvillet, January 27, 1851.
